

# ClassBase NMMS / IMS

## Webbased ASP-Version

### CLASSBASE NMMS/IMS DATABASE WEB ENGINE (BACKEND)

With the ClassBase Backend, power users are able to add, browse, modify and extract data from the ClassBase database. The number of simultaneously (concurrent) power users is limited by the type of backend license (5, 10, 20, 100 etc. users). Power users are users who are not only able to add data to the database, but also can view and query all information, define and manage actions and alarm dates, generate and format reports, graphs etc. from within every point of view based on the given access level. Power users are mostly (safety)managers and executives who are responsible for the managerial aspects. The smallest version of the database web engine is a five concurrent user version, upgrades are available for every time five more concurrent users. The ClassBase Enterprise version holds a license for an unlimited number of power users.

### CB-NMMS-NW-5 NMMS/IMS DATABASE WEB ENGINE (BACKEND)

Concurrent 5-user license of the ClassBase database web engine, suitable for installation on an IIS webserver. Complete solution for central and decentralised use to report and unlock information concerning incidents, accidents and unsafe situations. Extensive possibilities to format the output of data like custom build queries, graphs, tables, lists, matrices, reports etc. ClassBase backbone build on the hierarchical ClassBase catchword tree to build a blueprint of your organization. Extensive login module with department filters to include or exclude access and rights to the data or specific levels for individuals, groups, departments, locations etc. Standard MS-Access database or extended MS-SQL database.

#### Backend – Database – installation on one IIS webserver

CB-NMMS-NW-5 database application, 5 concurrent users onetime license fee	€ 10.890
Annual maintenance and support CB-NMMS-NW-5 each year 18%	€ 1.960

### CB-NMMS-FRONTEND INPUT APPLICATION WEBBASED

With the ClassBase Frontend, basic users are able to add, browse, modify and extract their own data from the ClassBase database. The number of simultaneously (concurrent) basic users is limited by the type of frontend license (20, 40, 60... 100 etc. users). Basic users are users who are able to add and browse data based on the user access level and user rights which are given to the user. Users can also view their own actions and alarm dates. The smallest version of the Frontend is a twenty concurrent user version, upgrades are available for every time twenty more concurrent users. The ClassBase Enterprise version holds a license for an unlimited number of basic users.

#### Frontend – Input application - installation on one IIS webserver
